santamargherita

THE ORIGINAL ITALIAN SURFACE

Santamargherita is driven by a passion handed down from generation to generation with deep roots in culture, tradition and skills, with a dedication to sustainability and creativity that has remained unchanged since 1962.

Every slab is a study in depth and balance, robust, refined, and resolute. Whether used for flooring, cladding, kitchens, or facades, each piece is created with intention and versatility. This allows for a range of natural stone materials that are as visually compelling as they are functionally enduring.

More than a simple surface, Santamargherita natural stone slabs embody the passion handed down from generations.
